

Jouselt A. Fernández

Nationality: Venezuelan

Work permit: Non-EU/EFTA. Requires employer sponsorship (CH B permit, quota-based; DE equivalent). Open to visa-sponsored roles and relocation.

Profile

Senior software developer with **10 years** building scalable, secure, user-focused web and mobile applications for top-tier international clients (Disney Parks & Cruise Line, Carnival Cruise Line, LATAM Airlines, Autodesk, Banchile Inversiones). Recent specialization in **applied AI engineering** (agents, MCP servers) with AI workflows structured through **AI-DLC** and **Spec Driven Development (SDD)**, plus real fullstack delivery with product bias: Node.js/NestJS services, API contracts, features shipped from concept to production.

Core Competencies

- **Frontend (advanced):** Angular 2–19, TypeScript (strict), React, Stencil.js / Web Components, RxJS, NgRx, Microfrontends, Ionic, a11y, i18n.
- **Backend & Integration:** Node.js, NestJS, WebSockets (WSS, PCI), REST APIs, BFF, microservices.
- **AI & Automation:** AI-DLC, Spec Driven Development (SDD, Kiro), MCP servers, agents (Copilot / Claude / OpenAI), steer-runtime (55+ agents).
- **Quality & Testing:** Jasmine, Karma, CI/CD, test coverage, technical-debt cleanup.
- **Tooling / Platform:** Git, Jenkins, GitLab CI/CD, Azure DevOps, JIRA, Confluence, Splunk.
- **Methodologies:** Scrum, Kanban, component-based architecture, technical leadership (20+ code reviews / sign-offs in the past year).

Professional Experience

Dec 2021–Present

Senior Fullstack Developer, *Globant*, Remote

Employer since Dec 2021; multiple assigned clients (date ranges below indicate each project/client). Highlights from the Disney Parks (WDW) client assignment (Apr 2024–Present):

- Led reusable **Angular 18** component development for high-traffic platforms (millions of monthly visits).
- Built the **Quick Quote Vista** web component (Stencil.js) from scratch, with 8+ international site variants (es-co, es-mx, es-ar, es-pe, es-cl, pt-br, UK, EU): date picker, party-mix validation, resort selector, responsive layouts.
- Resolved 15+ UI bugs across mobile/tablet/desktop breakpoints; improved unit-test coverage.
- Owned technical sign-offs and code reviews (20+ in the last year); mentored developers since 2017.
- Designed **Quick Quote API** (metasearch deep-link, parameter validation, structured logging with correlation IDs, Splunk dashboards).
- Built *steer-runtime* framework (55+ IDE-invocable specialized agents), using **AI-DLC** and **Spec Driven Development (SDD)**, plus **MCP servers** bridging agents to JIRA / Confluence / Splunk / GitHub Enterprise.

Santiago, Chile

+56 9 629 71117 • *jouselt@gmail.com* • *LinkedIn, Portfolio*

Sep 2023–Apr 2024 **Fullstack Developer**, *Globant*, Client: Carnival Cruise Line

- Designed and implemented a **WebSocket** solution for web ↔ POS device communication (Ingenico new devices, Verifone legacy compatibility).
- Integrated electronic signature and payment flows under **PCI** compliance.

Apr 2023–Aug 2023 **Frontend / Fullstack Developer**, *Globant*, Client: LATAM Airlines

- Led an internal **Angular** application from definition to production; scalable architecture and reusable components.
- Built passenger upgrade-eligibility tracking features.

Dec 2022–Mar 2023 **Frontend Developer**, *Globant*, Client: Disney Cruise Line

- New features for the Castaway Club platform ("Find Me" modal enabling guests to add previous trips to their profile); performance improvements and critical incident resolution.

Dec 2021–Oct 2022 **Frontend Developer**, *Globant*, Client: Autodesk

- Developed **Fusion 360 Web** with AngularJS and React; user self-service features (Personal Hub Retirement Self Service Window, ADP analytics for Personal Hub Retirement).

Nov 2020–Nov 2021 **Frontend Developer**, *Scharfstein Labs*

- UX redesign of Ionic mobile apps; feature development and usability work.

Nov 2018–Nov 2020 **Frontend Developer**, *RealSystems*, Client: Banchile Inversiones

- Investment portfolio tools, simulators, and operations-supervision dashboards under strict compliance and security standards (mutual funds, long-term investments; Bamboo CI).

Oct 2017–Nov 2018 **Frontend & Mobile Developer**, *She Drives Us*

- Hybrid transportation apps; new-developer onboarding.

May 2015–Sep 2017 **Frontend Developer**, *AIDEA*, Quito, Ecuador

- Created and maintained responsive SPAs for SMEs across several projects using AngularJS; coordinated with sales and design teams to turn client ideas into websites, landing pages, and email templates.

Education

2009–2014 **Computer Engineering (studies)**, *Universidad Simón Bolívar*, Caracas, Venezuela
Foundations in algorithms, software architecture, and computational thinking. Degree not completed; 10 years of equivalent professional experience since.

Languages

Spanish (native, C2), English (C1 – professional working proficiency).
